COMMUNICATION SOLUTIONS FOR HARD OF HEARING PEOPLE

COMMidt®

COMMidt is a Norwegian innovative company established in 1991. We produce communication solutions which are designed to simplify the everyday lives of the hard of hearing. Since 1991, in close partnership with Nordic competence environments, COMMidt has gained sound experience and thorough expertise in the kind of challenges the hard of hearing face.

Our vision is to produce user-friendly solutions by using cutting-edge technology and modern design.

Focus on innovative, high-quality sound solutions has always been the mainstay of our company's philosophy. We have chosen telecoil technology for our solutions, because it provides the best sound quality and eliminates all background noise. By using a multi-turn telecoil, the hard of hearing can receive sound directly to both ears, which significantly improves sound quality and voice recognition.

To satisfy our objective for cordless communication, we have chosen Bluetooth as our standard technology. Bluetooth is the only open standard: it is digital, flexible and has high speed two-way streaming that offers security against interception. The Bluetooth technology satisfies all the demands we place on communication systems.

COMMidt's catalogue includes the solutions we have designed for the hard of hearing. There is a description to accompany each product, as well as a picture and article number. Please contact us if you cannot find the product you are looking for.

Order your own product sheet or visit our website at **www.commidt.com** for more information.

CIBS COMMidt's Intelligent Bluetooth System

CIBS is the name of our innovative, cordless technology designed to assist the hard of hearing with all their communication needs.

CIBS´s main target areas are the typical problem areas for a Hearing Aid(s)/CI user:

- Telephony
- TV/Home entertainment
- Listening in noisy and exacting environments

- Digital and wireless communication
- Lip synchronised sound transfer
- Active noise reduction allowing optimal voice recognition
- Very long range
- Pre-paired sets for individual needs

Combine and put together different CIBS products based on your individual needs for our ready-to-use CIBS solutions.

MAESTRO

MAESTRO

Maestro is a multi-functional, amplified neck loop that comes equipped with the latest Bluetooth technology. Maestro transfers sound directly to the telecoil in your Hearing Aid(s) /CI.
The neck loop can be easily paired with up to 8 different Bluetooth units. Among these; mobile phone, TV, Radio, external microphone, PC, MP3, alerting system etc. You can also connect the Maestro to headphones and receive amplified sound without using your Hearing Aid(s)/CI.
Maestro is included in our CIBS TOTAL and CIBS HOME solutions.

ART.NO 108-011
Incl.: Maestro, clip, USB cable, international charger and earbuds

BLUES II

BLUES II

Blues II is a Bluetooth neck loop designed for mobile phones. Blues II transfers high quality sound directly from your phone to your Hearing Aid(s)/CI.
A multifunctional control button to answer, end and reject a call makes the neck loop easy to use.
Blues II is a stand-alone device, but is also included in our CIBS OFFICE solution.

ART.NO 108-002
Incl.: Blues II, clip, USB cable, international charger and earbuds

CIBS NECK LOOP

CIBS NECK LOOP

CIBS Neck Loop is an easy-to-use receiver that only works together with the unit it is paired up with. CIBS Neck Loop is included in our CIBS AUDIO and CIBS PERSONAL LISTENER solutions.

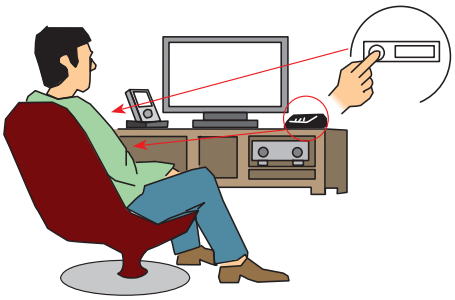
ART.NO 930-003
Incl.: CIBS Neck Loop

You can find technical information on page 15

AUDIOSTREAMER

AUDIOSTREAMER

The Audiostreamer is a lip-synchronised Bluetooth transmitter that produces top-class sound from your TV, Radio, CD, MP3 player etc. The Audiostreamer can also be connected to your alerting system.
The Audiostreamer is included in our CIBS TOTAL, CIBS HOME and CIBS AUDIO solutions.



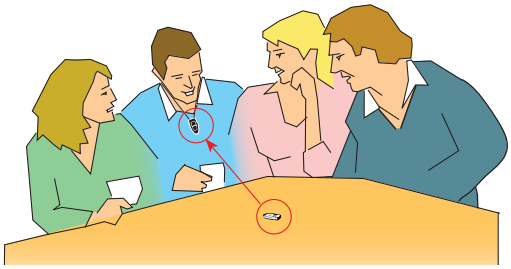
ART.NO 108-041
Incl.: Audiostreamer,
1 cable for connection to TV (scart/phono),
2 cables for connection to radio (phono),
1 cable for connection to MP3/CD player
(3.5 mm jack) and brackets

LIBERTO

LIBERTO

Liberto is an all-round microphone with two different integrated microphones; one directional and one omni-directional. The Liberto is thus convenient in all daily situations where amplified sound is required. The sound experience and speech recognition is optimal due to the digital processing of sound and the 12 dB reduction of background noise.
The Liberto is included in our CIBS TOTAL and CIBS PERSONAL LISTENER solutions.

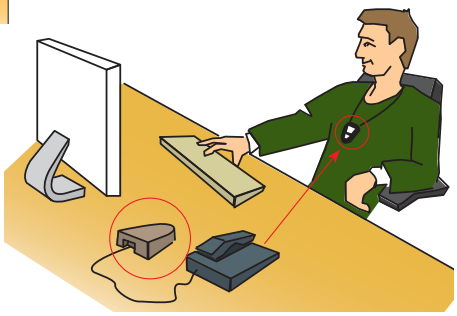
ART.NO 108-031
Incl.: Liberto, international charger and clip with string



TANGO

TANGO VII

Tango VII is a multifunctional Bluetooth amplifier for desk telephones. The Tango VII provides high sound quality and is suitable for most desk telephones. The Tango VII is the mainstay of our CIBS OFFICE solution.



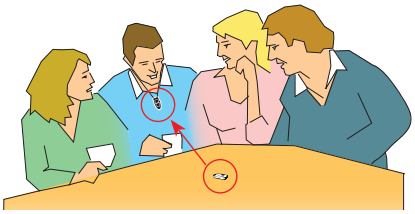
ART. NO 227-001
Incl.: Tango VII, power supply and cable to connect to phone

You can find technical information on page 15

MAESTRO

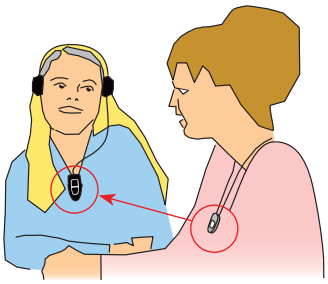
MAESTRO

All-in-one Bluetooth Communicator for everyday life!

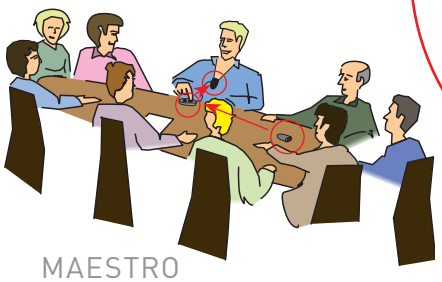


MAESTRO at a café or a restaurant

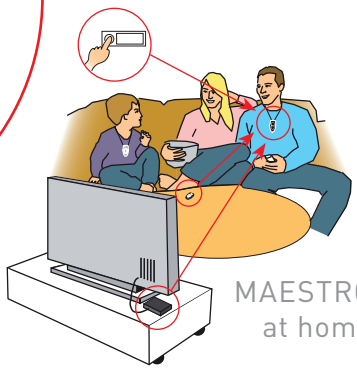
MAESTRO in leisure



MAESTRO as a personal listener



MAESTRO in public/meeting



MAESTRO at home

CIBS TOTAL

A complete and innovative 4 in 1 solution!

MAESTRO

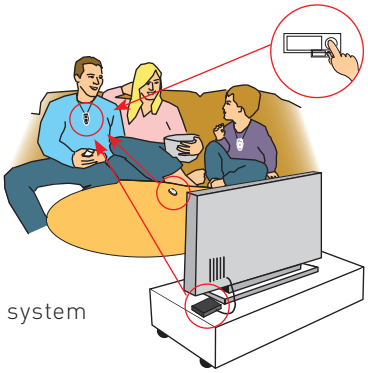
LIBERTO

AUDIOSTREAMER

CIBS TOTAL is a pre-paired set that is the optimal wireless solution for everyday life situations. The solution consists of an Audiostreamer, a Maestro and a Liberto. All devices in the package come complete with Bluetooth transfer capability, making them fully secure.

CIBS TOTAL is a 4-in-1 solution for:
- Mobile phones, cordless and desk-top phones equipped with Bluetooth
- TV/Home entertainment
- Personal Listeners, e.g. in cafes, meetings and classrooms etc.
- Possibility to connect alerting system so that you are aware of doorbells, smoke alarms etc.

- Lip synchronised transfer of quality sound from audio equipment such as TV, radio and conversation
- Bluetooth wireless and digital sound with A2DP Hi-Fi profile
- The Powerful Microphone can be held in the hand or placed on a solid surface near the sound source
- Automatic audible warning on Maestro from the alerting system
- Can be used with or without Hearing Aid(s)/CI as Maestro can be connected to headphones
- Separate Speed-Dial button on the back of Maestro that calls a pre-programmed number from your phone



ART.NO 108-101
Incl.: Maestro, Liberto, Audiostreamer with charger cradle, USB cable, international charger, headphones, clips, audio cables (2 phono, 1 scart, 1 jack 3.5 mm) and brackets

You can find technical information on page 15

CIBS HOME

Lip synchronized sound from your TV/Home entertainment and wireless telephony!

MAESTRO

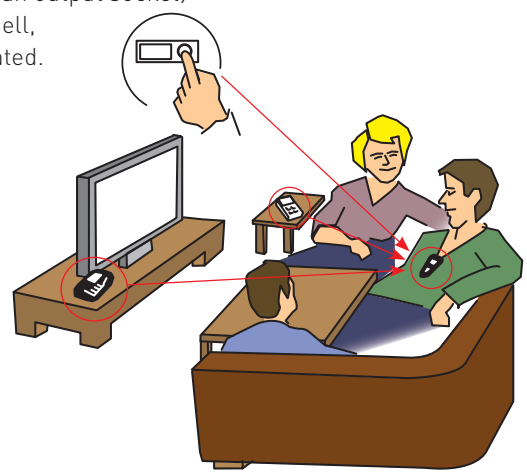
AUDIOSTREAMER

CIBS HOME is the optimal solution for the home. The CIBS HOME System consists of The Audiostreamer and a Maestro. The Audiostreamer transfers the sound from your home entertainment systems such as TV, Radio Hi-Fi and MP3 Player directly to the Maestro wirelessly via Bluetooth with outstanding sound quality and no delay in reception directly to the Hearing Aid(s)/CI, providing you have a T-Coil setting.
You are also able to connect an alerting system (with an output socket) to The Audiostreamer to enable you to hear the doorbell, Smoke Alarm or Intruder Alarm should they be activated.

The Audiostreamer has an integrated charger cradle which makes it incredible easy to charge Maestro. The volume is regulated on Maestro so that you only need to deal with one unit.

- Lip synchronised sound quality
- Extraordinary long range with up to 70 meters
- Automatic sound prioritizing
- Separate Speed-Dial button
- Bluetooth wireless and digital sound
- A2DP Hi-Fi profile

The optimal solution for TV and Bluetooth telephony!



ART.NO 108-161
Incl.: Maestro, Audiostreamer with charger cradle, USB cable, international charger, headphones, clips, audio cables (2 phono, 1 scart, 1 jack 3.5 mm) and brackets

You can find technical information on page 15

CIBS AUDIO

Lip synchronized Bluetooth sound transfer from the TV/Home entertainment

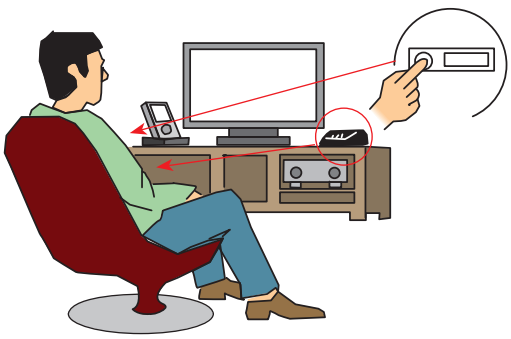
CIBS NECK LOOP

AUDIOSTREAMER

CIBS AUDIO is a 2-in-1 solution for the digital transmission of sound from TV, Radios, CD and MP3 Players.

This set consists of an Audiostreamer which transfers the sound via Bluetooth directly to the wireless CIBS Neck Loop into your Hearing Aid(s)/CI or headphones.

- Digital lip synchronised transfer of audio equipment such as TV, radio, CD etc
- Possibility to connect alerting system so that you are aware of doorbells, smoke alarms etc
- Simple connection of up to 4 audio units in addition to the alerting system
- A2DP Hi-Fi profile and long range, up to 70 metres
- Suitable for all kinds of Hearing Aid(s)/CI´s with T-Coil regardless of your Hearing Loss
- Possibility to use headphones
- Eavesdrop secure



ART.NO 108-141
Incl.: CIBS Neck Loop, Audiostreamer with charger cradle, headphones, clip, audio cables (2 phono, 1 scart, 1 jack 3.5 mm) and brackets

You can find technical information on page 15

CIBS PERSONAL LISTENER

An easy to use Bluetooth conversation amplifier

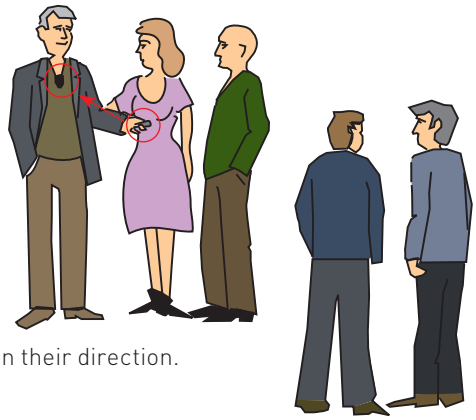
CIBS PERSONAL LISTENER enhances speech in challenging situations and is ideal for use in noisy environments such as restaurants, classrooms or in the car etc. The solution consists of a pre-paired CIBS Neck Loop and Liberto.

CIBS NECK LOOP

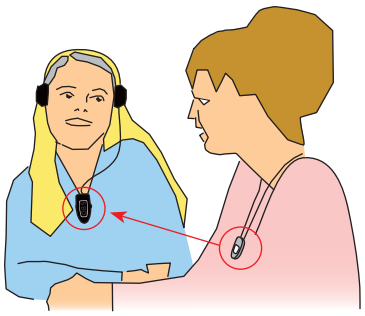
LIBERTO

TWIN CHARGER CRADLE

- Wireless lip synchronised sound
- Long range and excellent battery capacity
- Very good S/N ratio
- Switch between Liberto´s omni- and directional microphones for optimal sound quality
- Twin Charger Cradle included for easy storage and charging



Simply hand the Microphone to the speaker or point in their direction.



ART.NO 108-112
Incl.: CIBS Neck Loop, Liberto, headphones, clips with string and Twin Charger Cradle

You can find technical information on page 15

CIBS OFFICE

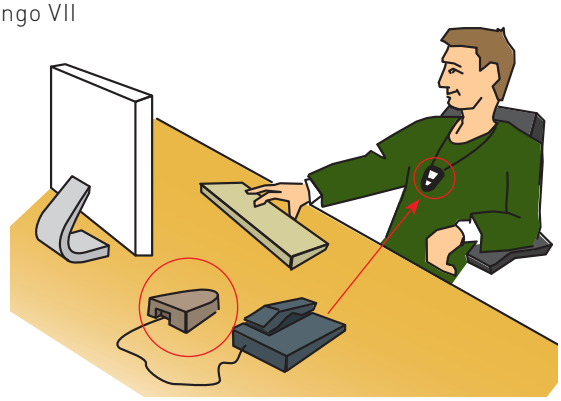
Wireless pre-paired multifunctional solution for your desk telephone with high quality sound

BLUES II

TANGO VII

The CIBS OFFICE solution consists of a pre-paired Bluetooth Tango VII and a Blues II neck loop. A common problem for Hearing Aid(s) wearer is the telephone at home and at work. OFFICE provides a wireless solution which covers the various needs for a Hearing Aid(s) wearer in the office environment. By using CIBS OFFICE you get high quality sound directly in the Hearing Aid(s)/CI.
You can also connect a headset lifter (accessory) to the desk phone in order to achieve further flexibility and range.

- Digital signal handling provides you with the latest technology within speech recognition and flexibility
- Simple connection and calibration of Tango VII
- Separate volume and tone adjustment, with LED light that remembers the last setting
- Remarkable range: up to 30-40 m from Tango VII
- Fits most types of telephones
- Secure for one to one conversations



ART.NO 108-113
Incl.: Tango VII, Blues II, USB cable, international charger, clip and cable to connect to telephone

You can find technical information on page 15

CIBS Accessories

At COMMidt we have a number of accessories which can further enhance the way your equipment is used in various areas.

DIRECTIONAL MICROPHONE

DIRECTIONAL MIC

All-round microphone with effective noise reduction

We have developed a corded, adjustable noise-reduction microphone which meets all our sound quality demands. This microphone reduces lateral and background sound (12dB) effectively, while still able to capture the desired sounds from a wide enough angle. Together with Maestro, it can be directed towards the person you are listening to. All making this a high quality voice amplifier. Our standard design solution comes with a small desk-top stand and an extension, so that you can place it in front of the person speaking.

- Effective noise reduction
- No batteries and easy to use
- Convenient for all COMMidt´s neck loops

ART.NO 914-002

TWIN CHARGER CRADLE

TWIN CHARGER CRADLE

The Twin Charger Cradle is ideal for making the storing and charging of CIBS's neck loops and microphones as easy as possible. This is perfect for charging two units simultaneously whilst only requiring a small amount of desk space.

ART.NO 957-001
Incl.: Twin Charger Cradle, brackets and international mains power

You can find technical information on page 15

Accessories

CLIP-ON MIC.

CLIP-ON MICROPHONE

The clip-on microphone improves sound quality and reduces background noise, as the microphone is placed closer to your mouth. The microphone is particularly suited to connect with Maestro or Blues II when in a car or using the phone outdoors.

ART.NO 901-001 (40 cm cable)
ART.NO 902-001 (150 cm cable)

AUDIO CABLE

AUDIO CABLE

The audio cable is ideal for listening to music from your TV, Radio, MP3 or PC etc, suitable for all audio equipment with an ordinary headphones outlet.

ART.NO 920-001

CAR CHARGER

CAR CHARGER

The charger can be used to charge CIBS products via the cigarette-lighter socket of your car. Suitable for both 12 V and 24 V.

ART.NO 907-001

HANDSET LIFTER

HANDSET LIFTER

The handset lifter lets you answer your calls remotely through Tango VII.
Its built-in ring detector alerts you to incoming calls. Then, it automatically lifts your handset off-hook when you activate your Blues II.

ART.NO 910-001
